

Bambu Divers Customer Agreement during the COVID-19 Pandemic

This agreement has been written in response to the SARS-CoV-2 i.e. COVID-19 pandemic of 2020. All customers need to read and agree to these terms prior to diving with Bambu Divers Dive Resort. We recognize that these rules are subject to change upon revision of governmental rules or new knowledge of the virus. Bambu Divers will inform all its active guests of any such change.

Bambu Divers takes the pandemic seriously and wants to minimize risk of contamination for all guests and staff of Bambu Divers. As such Bambu Divers promises to provide its guests the possibility to regularly wash their hands with soap and water or hand sanitizer. We recommend the use of masks, especially when inside one of our facilities and require people to uphold good social distance practices whilst on the business premises. Ratios of 4:1 guest to instructor / divemaster. Our boats will run to a maximum of 50 % normal capacity. No equipment can be left on the benches waiting for the next dive due.

It is the customer's responsibility to make sure that they look after their own hygiene and wash their hands regularly and properly according to the WHO guidelines. It is also the responsibility of the customer to avoid contamination in order to protect themselves as well as other guests and staff of Bambu Divers by avoiding touching their face and coughing in their elbow or equivalent. Bambu Divers cannot be held liable for looking after a person's personal hygiene.

Customers are asked to look after and clean assigned diving equipment. Dive equipment that needs special attention are: the snorkel, the two regulators, the mask and the BCD oral inflator.

Snorkels and masks have to be cleaned with soap and water and spitting is not allowed. When washing a mask, the nose pocket also needs to be washed.

Breathing regulators will be soaked for minimum of 5 minutes in bleach solution for disinfection and after the soaking, it will be washed with fresh water (tap water). Only the second stage mouth piece of the regulators should be placed in the bleach water.

Guest will be asked to not use the oral inflation of the BCD to clean the BCD. BCD oral inflators should be sprayed with disinfectant. It is important to say that touching in diving can be necessary and that if you are not willing to consent to the added risk that gives you, you cannot take part in the diving activities.

We ask guest to bring their own towel and refillable bottle/ container for drinks and water. Sharing of cups is not allowed.

Any guest with a history of COVID-19 requires a physician's medical evaluation prior to diving.

We welcome our guests to talk to us in case they have any concerns
